To Whom It May Concern:

As the library director for the Kennedale Public Library, it was my responsibility to oversee and furnish the new library/community center that the City of Kennedale constructed in 2006. In order to accomplish this task, I requested recommendations from other library directors in the Dallas-Fort Worth area. Many suggested that I would receive good service from Libra-Tech. I contacted Libra-Tech Corp. in May of 2006. At that time, I told Penny Gromatzky, the president, that we needed furnishings for a 6,000 square foot building that was scheduled to be finished September 11 of the same year! Penny said that she could help us but that we would need to make some fast decisions as we had to order by June 1 in order for the manufactures to meet our completion date. With help from Penny and her staff, we met the June 1 order date. Then our construction was delayed. Penny was able to reschedule the delivery of our shelving and furniture. When the new shelves and furniture was finally scheduled for delivery, Libra-Tech's installers arrived to oversee the offloading and to deal with the truckers. The installers brought all the tools and hardware that were needed for a very professional and efficient completion of the job.

From start to finish, Libra-Tech was there with recommendations, advice and the knowledge to finish our library project. It is my pleasure to give my highest recommendation to anyone who may be considering Libra-Tech for the purchase of a few pieces of furniture or the complete furnishing of a new facility. Large project or small, Libra-Tech will give each the necessary attention to detail that the project requires.

If you need more information about our project, please do not hesitate to contact me at 817-478-7876.

Sincerely,

Gwen Bevill
